

Principles of Microeconomics

Taylor J. Weidman | 348 Robins | tweidman@richmond.edu

September 23, 2022

Course Description

Lets begin with a big question, “What choices should we make when we can’t have everything?” Even the richest people in the world can’t have everything they might want. Wants exceed our resources. So how should we as individuals and groups go about making choices? Each of us make hundreds of choices every day as an individual and as a member of a larger social, economic, and political environment. This class is about this question, examining individual choices and choices interact in larger groups. Tools in this class organize your thinking about decisions we face as individuals and as a society.

At a high level, we will begin by building a model of cooperation, production, and shared benefit. Then we will look at how types of markets can coordinate decision-making between large groups of decisionmakers. In this framework, we will look at cases when markets work imperfectly and how government policy can address market failures. We will consider firms, market power, and how they behave in markets over time.

In this class there will be fewer traditional lectures than you might be familiar with, exams are always open book, and homework is submitted and returned online. Economics relies heavily on mathematics as a cognitive stepstool, and proficiency in algebra is helpful for this class. But no matter who you are or where you’re coming from, if you’re willing to work hard then you are more than capable of participating in the class. Welcome!

Course Resources

There are many resources available to help you master the material. Some of your time should be spent on homework, some on reading, and some in discussion with me and your colleagues in class. Economics is best learned through practice, so put in the time to master it. Class resources include:

- **Blackboard** holds the class together, where you’ll find
 - Announcements
 - Notesheets
 - Episodes (concept videos)
 - Demos (practice problem videos)
 - Homework
 - Study guides
 - Miniexam checklists

- **The Textbook** for the class is Gregory Mankiw's, *Principles of Microeconomics*, in the 5th edition. You can find the text with a simple search. More recent editions include updated examples but no new topics. Any addition of the text will do, even other principles of microeconomics books are usable, but will involve more work on your part. Let me know if you have questions.
- **Box** will be the portal to collect and return assignments.
- **Office Hours** are a great resource so come see me!
- **Peer Mentors**

1. _____
2. _____
3. _____

Grading

No matter your grade in the class, you belong in my classroom. All assignments, from homework to in-class assessments, are designed to push you to do excellent work and convince you of your critical thinking skills with as little unpleasantness as possible. There will be no busywork, trick questions, or high-stakes exams. And in return I expect you to work hard.

Your highest grades will count for a relatively large portion of your grade. This has the effect of lowering the stakes but also means you cannot simply add up the point totals to see how you are doing in the class. Your final grade will be based on the weighted average of all your scores in the following way:

- **Classwork (10%)** is a low-stakes check-in during the first few minutes of class some Tuesdays when there's not a Miniexam. This is a small part of your grade, but you'll get immediate feedback and will help you stay on track.
- **Homework ($5 \times 5\% = 25\%$)** assignments will be turned in individually on Box. Working together is strongly encouraged but all work should be your own. There will be six Homeworks and your lowest grade will be dropped.
- **Miniexams ($2 \times 20\% + 2 \times 10\% + 1 \times 5\% = 65\%$)** are designed for you to demonstrate competency and mastery of the most recent topics. Six Miniexams will take place during the first part of class. Your lowest Miniexam score will be dropped. Your top two Miniexam scores will count as 20% of your grade. Your third and fourth highest Miniexam scores will count as 10% of your grade. Your fifth highest Miniexam will count as 5% of your grade. More details will be made available at the time.

During the Miniexams: 1) You may use material from your notes and the textbook; 2) You may not use any material that requires internet access. Your exam should be your own and is subject to the Academic Conduct Code (below). If you are **at all unclear** about a particular piece of material with respect to these two guidelines, it is your responsibility to clarify its appropriateness with the instructor. Please email with any questions about what constitutes an academic violation. We take this very seriously.

Missed work cannot be made up post-hoc. Contact me before the due date to apply for an extension if you anticipate submitting late work.

I agree to assign myself the reading, in-class material, Classwork, Homework, and Miniexams.

Disability Services

If you have a disability, contact both the instructor and the Office of Disability Services, Boatwright Memorial Library B2-10, (804) 662-5001 as early as possible in the term. They will verify your disability and determine reasonable accommodations for this course.

Academic Conduct Code

All students are expected to adhere to the standards of the Student Honor Code. Any violation is a serious matter. Any student engaged in cheating, plagiarism, or other acts of academic dishonesty would be subject to disciplinary action, may 1) receive a zero on the exam counting for 20% of their class grade, or 2) receive an F in the class.

Final Notes

1. This class is designed for you to succeed. Work hard, be prepared, and don't hesitate to seek us out when you need help!
2. Students are responsible for all covered materials, announcements, and assignments.
3. I expect you to complete and upload your work early enough that you have time to work through any technology problems you run into. Please email me as soon as you run into problems.
4. I reserve the right to modify materials/procedures.

Course Schedule (*Tentative*)

(next page)

Week 1. (starting Aug. 22)		Week 2. (starting Aug. 29)	
Part A. Introduction to Class; Production Possibilities		Part A. Trade; Four Quadrant PPF	
Ch. 1, 2, 3	Due. Pre Homework	No Reading	Due. Homework A (Fri)
Week 3. (starting Sept. 5)		Week 4. (starting Sept. 12)	
Part B. Supply; Demand; Markets; Equilibrium		Part B. Consumers; Producers; Efficiency	
Ch. 4, 5	Due. MiniExam A (T)	Ch. 7	Due. Homework B (Fri)
Week 5. (starting Sept. 19)		Week 6. (starting Sept. 26)	
Part C. Externalities; Public Goods		Part C. Game Theory; Common Resources	
Ch. 10	Due. MiniExam B (T)	Ch. 11	Due. Homework C (Fri)
Week 7. (starting Oct. 10)		Week 8. (starting Oct. 17)	
Part D. Government Policies; Price Controls		Part D. Taxes; Subsidies	
Ch. 6	Due. MiniExam C (T)	Ch. 8, 12	Due. Extra study time
Week 9. (starting Oct. 24)		Week 10. (starting Oct. 31)	
Part D. International Trade		Part E. Costs; Monopoly	
Ch. 9	Due. Homework D (Fri)	Ch. 13, 15	Due. MiniExam D (T)
Week 11. (starting Nov. 7)		Week 12. (starting Nov. 14)	
Part E. Monopolistically Competitive Firms		Part E. Oligopolistic Firms	
Ch. 16	Due. Extra study time	Ch. 17	Due. Homework E (Fri)
Week 13. (starting Nov. 21)		Week 14. (starting Nov. 28)	
Part F. Factors of Production; Labor Market		Part F. Consumer Choice	
Ch. 18	Due. Extra sleep: 5 hours or more	Ch. 21	Due. Homework F (Fri)
Week 15. (starting Dec. 6)			
Due. Miniexam F (Tr)			

While the final grade breaks will depend on the exact distribution of scores, the worst case scenario is as follows:

97.0% and above	A+	93.0% to 96.9%	A	90.0% to 92.9%	A-
87.0% to 89.9%	B+	83.0% to 86.9%	B	80.0% to 82.9%	B-
77.0% to 79.9%	C+	73.0% to 76.9%	C	70.0% to 72.9%	C-
67.0% to 69.9%	D+	63.0% to 66.9%	D	60.0% to 62.9%	D-

Below 60% is an F. All grades are rounded to the nearest tenth of a percent.
