

ECON 0100 | Fall 2024

MiniExam A | Version 1

This MiniExam will take 15 minutes with quick break to follow. MiniExams are designed to both test your knowledge and challenge you to apply familiar concepts in new environments. Treat it as if you're trying to show me that you understand the material. Answer clearly and completely.

Academic Conduct Code

10

The following academic conduct code is designed to protect the integrity of your work. Print your name/initials beside the five academic honesty agreements. I pledge to my fellow students, the university, and the instructor, that:

- ___ I will complete this MiniExam solely using my own work.
- ___ I will not use any digital resources unless explicitly allowed by the instructor.
- ___ I will not communicate directly or indirectly with others during the MiniExam.

+10 PTS for PAGE 1

ROBRIIC CONTEXT

Q1.

a) This is mostly free points. They'll be in bad shape all the way through, if they miss this.

+2 ~~NO~~ :: NO

+5 :: YES

+0 :: BLANK

b) This is worth more because it separates students who will draw a new PPF between 2D and 1 from those who recognize this as a point.

+10 :: ~~NO~~ NO

← I'd love some partial credit options here

+4 ~~YES~~ :: YES

+0 :: BLANK

c) This should be mostly free points.

~~NO~~ +5 :: YES

+2 ~~NO~~ :: NO

+0 :: BLANK

d) Looking for both correct and with the right units.

+10 :: 2D

+7 :: 2 1/2 C

+5 :: 1/2 D ~~NO~~

+4 :: 2 C ~~NO~~

~~NO~~ +2 :: something else with a number

+0 :: blank

Q2.

a)

+15 :: UNATTAINABLE

+9 :: INEFFICIENT

+4 :: EFFICIENT

+0 :: BLANK

← shifted the PPF, but in the wrong direction

← doesn't understand the ^{PPF} setup, context, or the question

b)

+15 :: INEFFICIENT

+9 :: UNATTAINABLE

+4 :: EFFICIENT

+0 :: BLANK

pivoted

← shifted the PPF, but in the wrong direction

← not clear what's going on

← next time try to separate a pivot from a shift

Q3.

a) +9 :: LUNA

+4 :: NEVILLE

+0 :: BLANK

b) +9 :: LUNA

+4 :: NEVILLE

+0 :: BLANK

{ to not be indifferent

c) The first option is confusing, so no points for it. change it ✓ next time.

+4 :: last three options being correct

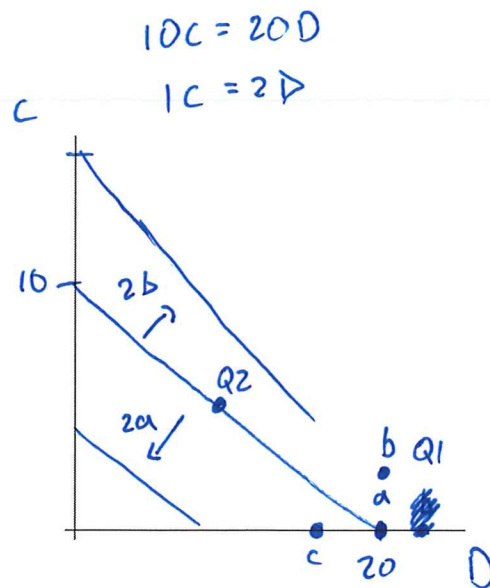

+1 :: ~~wrong~~ wrong

Q1. Arthur's PPF

30

Suppose Arthur can make 10 cakes or 20 drinks in one day.

Use a graph to guide your answers.

- 5 a) Is a daily output of 20 drinks attainable for him? YES
- 10 b) Is a daily output of 20 drinks and 1 cake attainable for him? NO
- 5 c) Is a daily output of 19 drinks attainable for him? YES
- 10 d) What is Arthur's opportunity cost of 1 cake? 2D

Q2. Shifts in the PPF

30

For the following two subquestions, suppose a daily output of 5 cakes and 10 drinks is efficient for Arthur.

- 15 a) If Arthur decides to cut back how much labor he devotes to making these two foods, is 5 cakes and 10 drinks unattainable, efficient, or inefficient? UNATTAINABLE
- 15 b) If Arthur discovers a new cake baking spell which tripples his daily output of cakes, is 5 cakes and 10 drinks unattainable, efficient or inefficient? INEFFICIENT

Q3. Specialization and Trade

30

Luna and Neville both operate candy shops specializing in Tarts and Chocolates. Their opportunity costs are listed in the following opportunity cost table.

Next time ask a question about their op costs directly. But maybe use a separate table.

	Chocolate	Tart
Luna	4/5 Tart	5/4 Chocolate
Neville	1/4 Tart	4 Chocolate

- 9 a) Which owner's shop has the comparative advantage in Tarts? LUNA
- 9 b) If Luna and Neville were to specialize and trade with each other, which shop should specialize in Tarts? LUNA
- c) Select all the exchange rates which could facilitate a trade between the two shops?

- 0 ? ☐ 1 Chocolate for 1/4 Tart
- 4 ☒ 1 Chocolate for 1/2 Tart
- 4 ☐ 1 Chocolate for 1 Tart
- 4 ☐ 1 Chocolate for 2 Tarts
